Apartment in San Luis ... ★ 4.89 (405)

Coastal Peaks Studio
1 queen bed

\$317 for 2 nights

Results

Model	Test R^2	MAE	MdAE	RMSE	Overfitting Gap
Baseline (Dummy)	-0.001	\$236.63	\$179.31	\$334.83	0.0012
Linear Regression	0.7055	\$128.98	\$95.82	\$181.61	0.0780
Random Forest	0.7283	\$116.15	\$77.96	\$175.04	0.0714
XGBoost	0.7324	\$115.48	\$76.90	\$173.12	0.0660

R^2 : how well does our model explain price patterns?

Mean Absolute Error (MAE): we're typically off by x dollars a night

Median Absolute Error (MdAE): we're typically off by x dollars a night
(not counting outliers)

Overfitting Gap: is the model memorizing or learning real patterns?

Improvements to Be Made

- Transfer learnings over to SLO data / obtain SLO data
- Incorporate seasonality
- Utilize more property information — e.g. photos of the property, property condition, types of views available from the property, exact GPS coordinates from popular nearby places

THANK YOU!
